Reema Saeed AlQahtani

Junior Software Engineering Student

Phone: +966 554513505 | Email: reemaalqahtani135@icloud.com

EDUCATION

Bachelor of Science in Software Engineering
King Fahd University of Petroleum & Minerals (KFUPM)
Expected Graduation: May 2027

Relevant Coursework:
Data Structures & Algorithms, Database Systems, Requirements Engineering, Operating Systems, Software Testing, Web Development, Machine Learning, Software Design, Software Project Management

PROJECTS

Smart Recipe Recommendation Web App | Web Development | 2026

- Built a web application that recommends recipes based on available ingredients.
- Implemented a smart matching score to rank recipes by ingredient compatibility.
- Added filters for cooking time, meal type, and ingredient exclusion (allergies).
- Tools: HTML, CSS, JavaScript

Campus Events Management System | Database Systems | 2025

- Designed and implemented a relational database system for managing university events.
- Developed EER diagrams, normalized schemas, SQL queries, triggers, and stored procedures.
- Ensured data integrity and efficient event registration and tracking.
- Tools: MySQL, SQL

E-commerce Cart Abandonment Prediction | Data Science | 2024

- Built an SVM model with RBF kernel to predict shopping cart abandonment behavior.
- Achieved 90.55% classification accuracy with 5-fold cross-validation.
- Conducted feature analysis, performance evaluation, and confusion matrix interpretation.
- Tools: Python, Scikit-learn

Advanced Data Structures Implementation | Algorithms & Data Structures | 2023

- Implemented core data structures including binary heaps, stacks, queues, and linked lists from scratch.
- Developed heap operations such as insertion, deletion, and bottom-up construction.
- Analyzed time and space complexity and validated correctness through structured testing.
- Tools: Java

TECHNICAL SKILLS

Programming: Java, Python, C, SQL, JavaScript

Web Development: HTML, CSS

Databases: MySQL, SQL, Triggers, Stored Procedures

Software Engineering: Data Structures & Algorithms, Software Testing, System Analysis, Software Design, Requirements Engineering

Tools: Git

EXPERIENCE

Logistics & Operations Team | TechHub Team | Sep 2025 – Present
Assisted with logistics coordination and on-site operations during TechHub activities.

Logistics & Operations Team | Diwan Community | Sep 2025 – Present
Assisted with exhibition setup, logistics, and visitor flow management.
